May 10,
2019

Are you looking for the best fitness website designs? Or do you want a fitness website template? Perhaps you already have a design in mind, and you're just looking for a fitness website creator. In any case..

You came to the right place.

See, many fitness studios invest a lot of money to get the perfect fitness website.

They hire the best designers and the best developers. Although that definitely is a great strategy, I have a better one for you.

The best part? **It's free.**

How to build a website just like the best fitness websites of 2019 in 4 steps

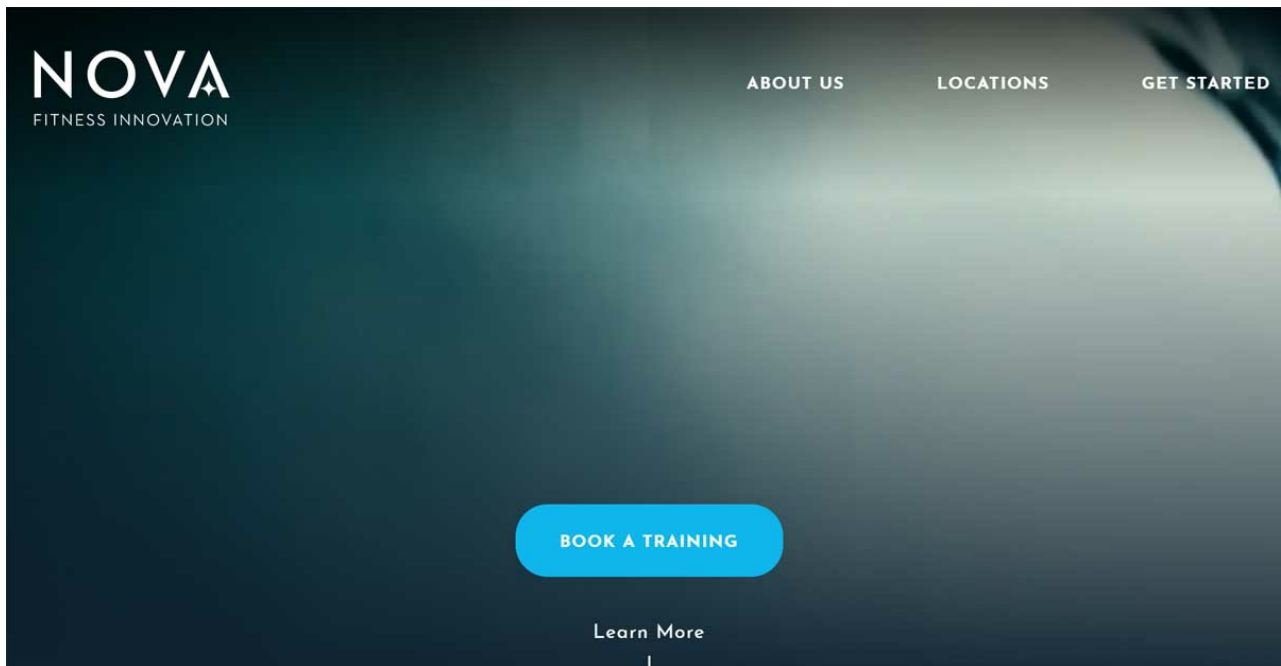

1. Analyze the best fitness websites of 2019 below
2. Make notes of what you like (and what you don't like)
3. Add your personal flavour to it
4. Design your own webpage with a great tool called [Divi](#)

Let's go.

The best fitness website designs

Selected for you in a clean list. We've crawled the web and looked at the best fitness websites of 2019.

After visiting countless websites and making some hard decisions we listed the best 10 fitness websites.

6 TIPS TO BUILD A GREAT WEBSITE

1. Get an easy domain name

Choosing your domain name is one of the most important decisions you'll have to make.

Please don't get fancy picking a *"strange but cool"* domain name.

Sure, 'thiswebsiteisawesomeeeee.com' seems like a fun name, but you can be assured people will misspell it every time.

You can search for available domain names [here](#).

2. Have support on your side

If you're building a website for the first time, it's nice to have some support. I've tried many hosting companies (and their support) but there is one which I keep coming back to.

It's called **WPX hosting**.

They focus on WordPress websites and have a 24/7 live chat which will help you with everything for **free**!

Alongside, they're **cheap** as well!

3. Design mobile first

Last year over 52% of all the website traffic worldwide came from mobile devices.

More than half of the website visits are on a mobile device.

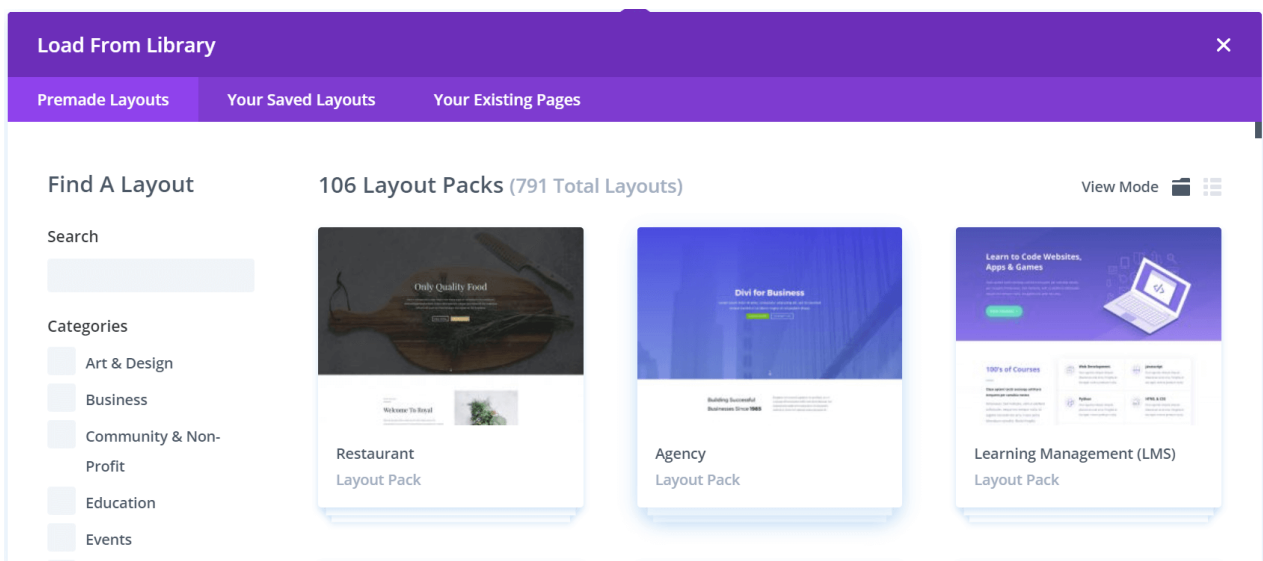

This percentage will only increase in the coming years, therefore the mobile design of your website is crucial for the success of your website. The **Divi builder** helps you to create a website which **automatically adjusts** according to the device.

4. Use templates to kickstart your website

Many **website builders** offer free templates to build your site.

Use them to your advantage and pick a nice one, change the texts and images and you're off to a good start.

Even without any designing experience your first website will look great!

5. Use storytelling

Nobody likes boring texts.

Your visitors want to feel like you're talking to them.

For example:

Version 1. *"Our processes are optimized to guarantee permanent support to improve your kpis."*

Version 2. *"Your company was built with blood, sweat and tears. We respect that, that's why our team is available 24/7 to help you in any way we can. Yes, we answer the phone during christmas eve".*

Which one is more appealing? Which one would make you pick up the phone? I bet it's the second.

It's talking straight to your visitor and tells an appealing story.

6. Picking the right website builder changes EVERYTHING
